

HEALTH NOTES FOR JUNE.

Pe-ru-na
FOR
SPRING CATARRH,
BLASSITUDE,
SLEEPSLESSNESS,
IRRITABILITY,
SPRING FEVER,
FATIGUE,
SKIN ERUPTIONS,
NERVOUSNESS,
LOSS OF APPELITE

Spring Catarrh is a well defined Spring disease. The usual symptoms are given above. A bottle of Pe-ru-na taken in time will promptly arrest the course of the disease known as Spring Catarrh.

School Children's Teeth.
An Ottawa gentleman considers the care of the teeth of school children of so much importance that he has offered half the cost of establishing a dental chair for the purpose. This is a new form of benevolence which, it is to be hoped, will become popular. Kingston (Ont.) News.

Florida has passed a law prohibiting diving for sponges, as the beds are injured thereby.

Paint Buying Made Safe
All lead packed in 100 lb. cans with this mark.

White Lead and Linseed Oil need no argument, no advertising to maintain themselves as the best and most economical paint yet known to man. The difficulty has been for the buyer to be always sure of the purity of the white lead and oil. We have registered the trade mark of the Dutch Boy painter to be the final proof of quality, genuineness and purity to paint buyers everywhere. When this trade mark appears on the keg, you can be sure that the contents is Pure White Lead made by the Old Dutch Process.

SEND FOR BOOK
"A Talk on Paint," gives valuable information on the paint subject. Free upon request.

Chicago

OF INTEREST TO WOMEN

New York City.—The Chesterfield coat is one of the latest developments of the mannish idea and it is essentially smart in effect. This one

is designed for young girls and it can be made either in the hip length illustrated or longer as liked, while it

One-Piece Hat.
The hat that is truly a washable one is the most practical of any in lingerie and has a certain dainty charm that renders it extremely effective. Here is one that is absolutely smart and altogether chic in effect, and which can be opened up and laundered without the least difficulty. In these days when the young girls and the young women all dress alike it is suited to both, and can be worn at any age from eight or ten to grown girlhood. In the illustration the material is embroidered linen, which is trimmed with little frills of Valenciennes lace and with ribbon, but there are many possibilities to be found in the design. A great many mothers like to do the needlework themselves, and it is quite easy to have a pattern stamped on linen and to embroider as elaborate a trim as one may like, or again plain material can be used with insets of embroidery or lace making the trimming and, indeed, almost any combination of washable materials can be used that may suggest itself to the individual fancy. For the younger contingent use French pique with simply scalloped edges is exceedingly dainty and exceedingly fashionable, while it will endure the hardest kind of service. Again, extremely dainty effects can be obtained by the use of lace medallions and the like.

Somewhat quieter conditions prevail in the primary market for cotton goods, although prices are higher where any alteration has occurred. After a fair volume of business in serges and the cheaper lines of woolen goods which have been opened for some weeks, the market is quiet, awaiting the opening of medium priced lines. Weather conditions have retarded the movement of dress goods. Few duplicate orders for the fall season are appearing, although this business should have been completed some time ago.

New England foot wear manufacturers report trade backward, although there are indications that fall orders will soon improve.

Trade in leather is quiet, with stocks gradually accumulating, although some is firmly held.

is adapted to almost every seasonable material. In the illustration covert cloth is simply stitched with belding silk, but all the materials that are used for girls' coats are appropriate for this one, cloth, serge, chevrot and the like.

The coat is made with fronts, backs and side backs and the side back seams are cut with extensions below the waist line that are pleated to give the Chesterfield effect. The fronts are supplied with three generous pockets, and there are regulation sleeves, while a regulation collar and lapels finish the neck.

The quantity of material required for the sixteen-year size is three and a half yards twenty-seven, two and an eighth yards forty-four or one and seven-eighths yards fifty-two inches wide for hip length, five and three-eighths yards twenty-seven, three and a quarter yards forty-four or two and five-eighths yards fifty-two inches wide for three-quarter length.

Fashionable Gems.
Of the minor gems of which the smartly-gowned woman now makes much there is a translucent green stone known as amazonite. It is of vivid and yet a soft green, and purposely is worn on a platinum chain to look as if detached, and to make a brighter centre of color on a white blouse. Rose quartz is another of the same kind used for necklace ornaments and hatpins. Aquamarine in pale blue or green, once worn in little brooches to fasten old-fashioned turn-down lace collars, is another favorite, and, like the rose crystal, is made into beads, hatpins, pendants, buttons and chains.

Lace Parasol Covers.
Covers wrought all of real lace in black or white, and equally expensive productions that are intricate masses of embroidery, hand paintings and lace, all being among "Editions de Luxe" in the parasol field.

Petticoat Not Conspicuous.
The fashionable street petticoat is no longer conspicuous in color. Bright-hued skirts for walking suits are tabooed.

Embroidery and Lace.
Very beautiful collar and cuff sets may be made without much work by edging the embroidery with Valenciennes lace, slightly full.

The hat is made in one piece, that is to say, the crown and the full brim are cut in one. It allows a choice of single or double brim, and when the double brim is used it means an additional circular piece, which is arranged under the outer one. There is a casing applied round the crown, and in this casing tapes are inserted that draw the fullness up to the size of the head and which allow of lay-

ing the hat out perfectly flat when cleansing is necessary. The ribbon is simply passed round the crown and bowed in any way that fancy may suggest.

The quantity of material required for the medium size is three-quarter yard twenty-seven inches wide when one brim is used, one and a half yards when two brims are used, six and three-quarter yards of lace for frills and three yards of ribbon for the bow and band.

Rainy Day Hats.
Smart young women are wearing for rainy days large straight-brimmed hats of the sailor variety trimmed only with a well-poised bird or egrette and a crown band of twisted silk.

Embroidery and Lace.
Very beautiful collar and cuff sets may be made without much work by edging the embroidery with Valenciennes lace, slightly full.

FINANCE AND TRADE REVIEW

DUN'S WEEKLY SUMMARY

While Other Businesses Are Halting Iron Mills Are Rushed to Fill Orders.

Despite some improvement, weather conditions have continued adverse for retail trade at most points. Business is only stimulated by bargain sales. Prospects for fall distribution are brighter, because of the better crop reports. Manufacturers receive liberal orders for next season. Still current conditions are not satisfactory. Mercantile collections are below normal, except in sections where country storekeepers have been enabled to make prompt settlements, because high prices attracted much marketing of last year's grain.

Record breaking production of pig iron without causing accumulation is ample evidence of unprecedented activity in the steel industry. Implement makers buy bars regardless of reports that crops are smaller and the congestion at pipe and sheet mills is not relieved.

New business in structural shape comes forward steadily. Despite the activity of blast furnaces the output of coke has increased so much faster that pressure to unload cars brought lower prices for spot.

Somewhat quieter conditions prevail in the primary market for cotton goods, although prices are higher where any alteration has occurred.

After a fair volume of business in serges and the cheaper lines of woolen goods which have been opened for some weeks, the market is quiet, awaiting the opening of medium priced lines. Weather conditions have retarded the movement of dress goods. Few duplicate orders for the fall season are appearing, although this business should have been completed some time ago.

New England foot wear manufacturers report trade backward, although there are indications that fall orders will soon improve.

Trade in leather is quiet, with stocks gradually accumulating, although some is firmly held.

A French invention, consisting of bulb thermometers, predicts at sundown whether there will be a frost.

That our American forests abound in plants which possess the most valuable medicinal virtues is abundantly attested by scores of the most eminent medical writers and teachers. Even the untutored Indians had discovered the usefulness of many native plants before the advent of the white race. This information, imparted freely to the whites, led the latter to continue investigations until to-day we have a rich assortment of most valuable American medicinal roots.

Dr. Pierce believes that our American forests abound in plants which possess the most valuable medicinal roots for the cure of most obstinate and fatal diseases. If we would properly investigate them, and in the investigation of this conviction, he has published the almost inexhaustible cures effected by his "Golden Medical Discovery," which has proven itself to be the most efficient stomach tonic, liver purifier, heart tonic and regulator and blood cleanser known to medical science. Dyspepsia, or indigestion, torpid liver, functional and even valvular and other affections of the heart yield to its curative action. The reason why it cures these and many other affections, is clearly shown in a little book of extracts from the standard medical works which is mailed free to any address by Dr. R. V. Pierce, of Buffalo, N. Y., to all sending request for the same.

Not less marvellous in the unparalleled cures it is constantly making of woman's many peculiar affections, weaknesses and distressing derangements, is Dr. Pierce's Favorite Prescription, as is amply attested by thousands of published testimonials contributed by the grateful patients who have been cured by it of catarrhal pelvic affections, painful periods, irregularities and other displacements caused by weakness, ulceration of uterus and kindred affections, often after many other advertised medicines, and physicians had failed.

Both the above mentioned medicines are wholly made up from the glyceric extracts of native medicinal roots. The processes employed in their manufacture were original with Dr. Pierce, and they are carried on by skilled chemists and pharmacists with the aid of apparatus and appliances specially designed and built for this purpose. Both medicines are entirely free from alcohol and all other harmful, habit-forming drugs. A full list of their ingredients is printed on each bottle-wrapper.

Electric furnaces at Notodden, Norway, are capable of producing about 1,000 tons of Chile saltpeter annually.

WORKING WOMEN, WHAT THEY SHOULD KNOW

MRS. SADIE ABBOTT MRS. PREE MCKITTRICK

Women for the most part spend their lives at home, and it is these women who are willing and ambitious that their homes shall be kept neat and pretty, their children well dressed and tidy, who do their own cooking, sweeping, dusting and often washing, ironing and sewing for the entire family, who call for our sympathy.

Truly the work of such a woman is "never done" and is it any wonder that she breaks down at the end of a few years, the back begins to ache, there is a displacement, inflammation or ulceration of the abdominal organs, a female weakness is brought on, and the struggle of that wife and mother to continue her duties is pitiful.

Lydia E. Pinkham's Vegetable Compound, made from native roots and aloe, is the exact medicine a woman needs whose strength is overtaxed. It keeps the feminine organs in a strong and healthy condition. In preparing for childbirth and recuperating therefrom it is most efficient. It carries a woman safely through the change of life and in helping her strong and well assists her to be a good wife and mother.

Mrs. Sadie Abbott, of Jeannette, Pa., writes: "I suffered severely with pain every month and also a pain in my left side. My doctor prescribed for me but did me no good; a friend advised Lydia E. Pinkham's Vegetable Compound and I wrote you in regard to my condition. I followed your advice and am a perfectly well woman. The pains have all disappeared and I cannot recommend your medicine too highly."

Women should remember that Lydia E. Pinkham's Vegetable Compound holds the record for the greatest number of actual cures of female ills. Every suffering woman in the United States is asked to accept the following invitation. It is free, will bring you health and may save your life.

Mrs. Free McKittrick, of La Farge, Wis., writes: "For six years I suffered from female weakness. I was so irregular that I would go from three weeks to six months, so I thought I would give Lydia E. Pinkham's Vegetable Compound a trial. 'Now I am once more well and can do my work without a pain. Any one who wishes, can write to me and I will answer all letters gladly.'"

Women suffering from any form of female weakness are invited to promptly communicate with Mrs. Pinkham, at Lynn, Mass. From the symptoms given, the trouble may be located and the quickest and surest way of recovery advised. Out of her vast volume of experience in treating female ills Mrs. Pinkham probably has the very knowledge that will help your case. Her advice is free and always helpful.

Mrs. Pinkham's Invitation to Women. Women suffering from any form of female weakness are invited to promptly communicate with Mrs. Pinkham, at Lynn, Mass. From the symptoms given, the trouble may be located and the quickest and surest way of recovery advised. High Prices for Shakespearians. There was an interesting book sale at Sotheby's in London recently. A first folio Shakespeare brought \$12,000. A first edition of "Forke and Lancaster," the foundation of Shakespeare's Henry IV., was sold for \$8,550. A play "Arden of Feversham," dated 1592, and originally attributed to Shakespeare, went for \$6,050. A rare first edition of King Lear was knocked down for \$1,250. A fine quarto Merchant of Venice fetched \$2,550. The original manuscript of Sir Walter Scott's History of Scotland sold for \$2,550. A third folio Shakespeare made a record price of \$7,750.

BLACK, ITCHING SPOTS ON FACE.
Physicians Called It Eczema in Worst Form—Patient Despaired of Cure—Cuticura Remedies Cure Her.

"About four years ago I was afflicted with black spotsches all over my face and a few covering my body, which produced a severe itching irritation, and which caused me a great deal of suffering, to such an extent that I was forced to call in two of the leading physicians of— After a thorough examination of the dreaded complaint they announced it to be skin eczema in its worst form. Their treatment did me no good. Finally I became despondent and decided to discontinue their services. Then my husband purchased a single set of the Cuticura Remedies, which entirely stopped the breaking out. I continued the use of the Cuticura Remedies for six months, and after that every spotch was entirely gone. I have not felt a symptom of the eczema since, which was three years ago. Mrs. Lizzie E. Sledge, 519 Jones Ave., Selma, Ala., Oct. 23, 1905."

A French invention, consisting of bulb thermometers, predicts at sundown whether there will be a frost.
